Profile

Computer Science graduate with hands-on experience in Retrieval-Augmented Generation (RAG), FAISS vector databases, and LLM integration. Built a personalized mathematics learning system that detects student knowledge gaps and generates curriculum-aligned practice with source citations. Eager to contribute as a junior AI/ML Engineer.

Education

University of Gondar

2022 – 2026

Bachelor of Science in Computer Science

- GPA: 3.55/4.0

Technical Skills

- **AI/ML:** RAG Architecture, FAISS, LLM Integration, Scikit-learn, Pandas, NumPy
- **Backend:** Python, Flask, REST APIs
- **Frontend:** React
- **Database:** MySQL
- **Tools:** Git

Projects

EDUCARE - RAG-Based Mathematics Learning System

Jan 2026 – Ap 2026

- Built RAG system using FAISS vector database indexing 800+ pages of Ethiopian Grades 9-12 Mathematics curriculum
- Integrated LLM (OpenAI/LLaMA) to generate personalized practice exercises with source citations
- Designed mastery-based progression requiring 70% threshold before advancing to next topic
- Built role-based dashboards (Student, Teacher, Family, Admin) with JWT authentication
- Led technical implementation and delivered the full working system

Full-Stack Job Portal

Jul 2025 – Aug 2025

- Engineered job portal with React frontend and Laravel REST API
- Designed normalized MySQL database with 8+ tables
- Implemented user authentication, role-based access, and job application workflow

Experience

AlyahSoftware

Jul 2025 – Sep 2025

Software Development Intern

Bahir Dar, Ethiopia

- Built reusable components in React/Laravel for full-stack applications
- Collaborated in Agile environment with daily stand-ups and sprint planning
- Participated in code reviews and contributed to team documentation

Volunteer

Adishiwot Charity Group

Jan 2025 – Jun 2026

Volunteer Team Member

- Coordinate 90+ volunteers in organizing donation drives and fundraising events
- Support 100+ disabled, elderly, and orphaned community members annually

Languages

English (Fluent), Amharic (Native)
